

New Surface for Park Basketball

TK Play Limited recently laid a new soft rubber mulch surface area beneath the basketball hoop in Rock Park.

Earlier in the year, The Rock Park Trust had noticed that the ground directly below the basketball hoop in the park was deteriorating due to general wear and tear. The Trust investigated different surface area options. Soft rubber mulch is flexible, 100% recycled rubber, very porous and environmentally friendly.

The Trust Officer, Miss Natasha Lewis, said: “The Rock Park Trust wanted to help find a solution to alleviate the wear and tear on the grassed area, and also provide a surface area that was ‘bouncy’ for a basketball.”

Come along and try out the new surface area!
