

ROCK PARK

Play Equipment – Fencing

The Rock Park Trust recently raised concerns about the safety of the area surrounding the zip line in the children's play area. It was a concern that smaller play equipment was positioned near the zip wire, with a possibility of children entering the path of the zip line while it was being used.

The Trust felt that additional safety requirements would be needed to separate the area, and after investigations it was decided that the best option was to put staggered fencing along the path of the zip wire.

Fox Fencing Limited have just finished installing the fencing and children can now use the very popular zip wire in its own safe area.
